*Course Activity Report on*  
**HOTEL MANAGEMENT SYSTEM**  
**in**  
**C/C++**

***Submitted by***

Punith Honnunar(2GI17EC088)

Pruthviraj Chavan(2GI17EC087)

Pavan Sogalad(2GI17EC070)

Rutik Budihal(2GI17EC102)

**Guide**

Prof. Maya.C

(Assistant Professor)

**2019-2020**

## **OBJECTIVE:**

Implementation of hotel management system in C using structures, functions and looping constructs, with the following functionalities

- Adding Patient Info
- Viewing Patient Info
- Deleting Patient Info
- Exit

## **CODE:**

```
#include<stdio.h>
#include<string.h>
struct ad
{
    char name[30];
    char disease[30];
    int cabin,phone,age;
} x[100];
int n,i,j=0,a=0,sum=0,g,flag,num;
void add();
void view();
void del();
void read();
int main()
{
    int c,i,q;
    printf("GIT Hospital Management System\n");
    int m,n;
```

//making out the pattern

```
for(m=1; m<=4; m++)
{
    for(n=1; n<=5; n++)
        printf(" ");
    for(n=1; n<=m-1; n++)
    {
        printf(" ");
    }
    for(n=1; n<=4-m+1; n++)
    {
        if(n==4-m+1 || m==1 || m==4)
            printf("*");
        else
            printf(" ");
    }
    for(n=1; n<=4-m+1; n++)
    {
        if(n==1 || m==1 || m==4)
            printf("*");
        else
            printf(" ");
    }
    printf("\n");
}
for(;;)
{
```

```

    printf("***Enter your choice**\n\n1. Add Information\n2. View
Information\n3. Delete Information\n4. Exit\n\nOption=");
    scanf("%d",&c);//choice for option
    fflush(stdin);//making it clear
    switch(c){
        case 1://add
            add();
            break;

        case 2:
            view();
            break;
        case 3:
            del();
            break;
        case 4:
            exit(0);
        default:
            printf("\n\nInvalid input , try again by using valid inputs");
            printf("\n\n");
    }
}

void add()
{
    printf("\n\n");
    printf("Number of entries present on the database
    =%d\n\n",num);//how many inputs

```

```

printf("How many entry do you want to add=\n");
scanf("%d",&n);
sum=n+num;
FILE *fp = fopen("patient.txt","a");
if(fp == NULL)
{
    printf("Error");
    exit(1);
}
for(i=num,j=0; i<sum; i++)
{
    printf("\n");
    //fflush(stdin);
    printf("Enter patient's Name = ");
    gets(x[i].name);
    fprintf(fp, "Name = %s\n",x[i].name);

}
num = fread(x, sizeof(struct ad),100, fp);
fclose(fp);
}

```

```

void del()
{
    int f,h;
    printf("Enter the serial number of the patient that you want to
delete=");
    scanf("%d",&f);
    if(f<num)
    {
        printf("What do you want ?\n");
        printf("1.Remove the whole record\n2.Remove Name\n3.Remove
Disease\n4.Remove age\n5.Remove Cabin\n6.Remove phone
number\nOption = ");
        scanf("%d",&h);
        if(h==1)
        {
            while(f<num)
            {

```

```
        strcpy(x[f].name,x[f+1].name);
        strcpy(x[f].disease,x[f+1].disease);
        x[f].age=x[f+1].age;
        x[f].cabin=x[f+1].cabin;
        x[f].phone=x[f+1].phone;
        f++;
    }
    num--;
}
else if(h==2)
{
    strcpy(x[f].name,"Cleared");

}
else if(h==3)
{
    strcpy(x[f].disease,"Cleared");
}
else if(h==4)
{
    x[f].age=0;
}
else if(h==5)
{
    x[f].cabin=0;
}
else if(h==6)
{
    x[f].phone=0;
```

```

    }

}

else

    printf("\n\nInvalid Serial number\n");

}

```

## OUTPUT:

### Case 1:

```

C:\Users\PUNITH\Desktop\finalc.exe
Enter phone number = 9876543210
**Enter your choice**
1. Add Information
2. View Information
3. Delete Information
4. Exit
Option=2
Serial Number=0
Name = Pavan
Disease = cold
Cabin no = 1
Phone number = 01286608618
Age=20
**Enter your choice**
1. Add Information
2. View Information
3. Delete Information
4. Exit
Option=

```

### Case 2:

```
C:\Users\PUNITH\Desktop\finalc.exe
GIT Hospital Management System
*****
**
**
**
**Enter your choice**
1. Add Information
2. View Information
3. Delete Information
4. Exit
Option=1

Number of entries present on the database =0

How many entry do you want to add=
1

Enter patient's Name = Pavan
Enter disease = cold
Enter the age = 20
Enter cabin no = 1
Enter phone number = 9876543210
```

### Case 3:

```
C:\Users\PUNITH\Desktop\finalc.exe
Serial Number=0
Name = Pavan
Disease = cold
Cabin no = 1
Phone number = 01286608618
Age=20

**Enter your choice**
1. Add Information
2. View Information
3. Delete Information
4. Exit
Option=3
Enter the serial number of the patient that you want to delete=0
What do you want ?
1.Remove the whole record
2.Remove Name
3.Remove Disease
4.Remove age
5.Remove Cabin
6.Remove phone number
Option =
```

### Limitations:

- Cannot edit the data
- Code has restricted stored data

**Improvements:**

- Editing the stored patients data.
- Adding some more options for data.
